Software Developer | JavaScript | React | JQuery | Typescript | Node
| MongoDB | SQL | API/GraphQL | OOP | Unit Testing | Agile Scrum
Methodologies | Technical Writing proficiency.

Cyprus

Summary

Meet me, Jack, Software Engineer and avid explorer of web3, cryptography, blockchain, and DeFi realms. With years of navigating coding landscapes, I traverse everything from version control systems to AI.

From crafting intricate code to documenting it, my journey involves mastering front-end and back-end web technologies, hence, full-stack. Alongside technical writing prowess, I'm well-versed in version control systems, command-line interfaces, and agile methodologies.

Feel free to drop a line or two.

Experience

100Devs

Full Stack Engineer

January 2022 - Present (1 year 10 months)

- Collaborating with a team of developers to build modern and responsive web applications.

- Utilizing best practices in web development to ensure high-quality results.

- Building semantically structured full-stack web applications.

- Adhering to agile methodologies, specifically SCRUM, for effective project management.

- Demonstrating a deep understanding of web development technologies and techniques.

- Exhibiting strong collaboration and teamwork skills.

- Contributing to the successful delivery of web applications that meet the needs of clients and end-users.

Fiverr

4 years

Software Engineer

November 2020 - Present (3 years)

- Creating software applications based on client specifications and requirements.
- Software testing and debugging to ensure it meets client requirements and is bug and error free.
- Updating and maintaining software applications to ensure they remain functional and compatible with cutting-edge technology.
- Collaborating with clients and team members to gather requirements, provide progress updates, and discuss any issues that arise during the course of the project.
- Managing project timelines, budgets, and resources to ensure software development projects are completed successfully.
- Keeping up with industry trends and constantly improving skills and knowledge in order to provide high-quality software solutions to clients.

Technical Writer

November 2019 - Present (4 years)

- As a freelance technical writer, I create clear and concise technical documentation, such as user manuals, instructional guides, and software documentation, that communicates complex information in an understandable manner.
- Conducting research: I conduct research on a variety of related topics to ensure that the information presented is accurate and up to date.
- Collaboration with subject matter experts: I collaborate with subject matter experts, project managers, and other stakeholders to gather information and develop technical content that meets their requirements.

- Editing and proofreading: I edit and proofread technical documents to ensure that they are error-free, well-organized, and meet the standards that have been established.

- Following established style and formatting guidelines: To ensure consistency and clarity across all technical documentation, I adhere to established style and formatting guidelines.

- Handling project schedules and finances: I oversee project schedules and finances to make sure that all technical documentation is finished promptly, affordably, and to the client's satisfaction.

The Urban Writers

Technical Writer

April 2023 - Present (7 months)

Toronto, Ontario, Canada

- Creating engaging technical and concise technical ghostwritten content that engages the readers of my clients.

- Ensuring adequate research and analysis are thoroughly conducted to gather accurate, credible, and well-informed data for technical topics.

- Documentation writing that provides instructional user guides for software and hardware products.

- Working closely with subject matter authorities to gather expert insights and analysis.

- Editing and proofreading with in-house editors to ensure clarity and adherence to laid-out style guides.

International Association of Professional Writers and Editors

Technical Writer

November 2022 - Present (1 year)

New York, United States

- Content Excellence: Skillfully generating blockchain-related and DeFi-focused content, including articles, blogs, and copy. Maintaining alignment with industry standards while

highlighting dApps and Ethereum Virtual Machine capabilities.

- **Precision Research:** Conducting meticulous research on web3 and Ethereum functionalities, ensuring accurate and reliable content creation. Verifying facts related to DAOs and blockchain technologies.
- **Guideline Adherence:** Adaptable writing style for various audiences within the blockchain, DeFi, and dApps sectors. Following project briefs and style guides while showcasing expertise in Ethereum applications.
- **Deadline Achievement:** Managing tasks within the dynamic realm of blockchain, DeFi, and web3. Utilizing exceptional time management for on-time delivery of content, demonstrating Ethereum insights.

Mangu Solutions
